DS Lub company information and evidence checklist

Please complete this questionnaire and collect the matching files. We will use approved answers and original images to replace website demo content. Do not share passwords, API keys or customer personal data in this document.

Prepared 4 October 2026. Owner: _____. Reviewed by: _____. Target handover date: _____.

For each item, record answer, evidence filename/link, responsible person, approval status and last verified date. Mark unavailable items rather than inventing an answer. Checkboxes mean evidence is collected and approved, not merely that someone has answered.

Company identity

[ ] What is the exact legal business name and public brand name? Current public name: DS Lub.

[ ] What is the official registered address? Is the workshop/service address different? Which address should visitors use?

[ ] Confirm Vadodara, Gujarat, service area and postal PIN code. Reconcile Makarpura/Gotri public directory entries.

[ ] Confirm +91 9173235606 for phone and WhatsApp. Who answers each channel and during which hours?

[ ] Supply official sales/support email, owned domain, business hours and approved map location.

[ ] Provide legal registration/GST evidence privately for verification; approve which identifiers may appear publicly.

[ ] Supply founding date and company history with evidence. Which milestones are safe to publish?

[ ] Identify manufacturing, assembly, trading and service activities accurately. Which products are manufactured by DS Lub?

[ ] Provide official logo in SVG/PDF and PNG with transparent background; identify brand colors and usage rules.

Answer and evidence reference: _____

Product catalogue

Complete one record for every sellable model and variant. Include units, ranges and test conditions. A pump image or model name alone is insufficient.

[ ] Product name, category, model, unique SKU, slug, short description and detailed approved description.

[ ] Manufacturing brand, whether own manufacture/resale, and permitted use of other brands' trademarks.

[ ] Variant differences: voltage/phase/frequency, reservoir size, drive type, materials, connection/thread sizes, mounting and orientation.

[ ] Oil/grease compatibility, viscosity/NLGI ranges, pressure, flow, output per stroke, cycle/control details, working temperature and environment restrictions.

[ ] Dimensions, weight, packing dimensions, mounting drawing and installation space requirements.

[ ] Supported system types, compatible distributors/controllers/tubes, application examples and exclusions.

[ ] Contents of package, optional accessories, compatible spares and recommended replacement parts.

[ ] Current stock by SKU/location, low-stock threshold, lead time, made-to-order and out-of-stock behavior.

[ ] List price in INR, GST-inclusive/exclusive treatment, applicable HSN/GST, minimum order, bulk price tiers and quote-only products.

[ ] Datasheet PDF, manual PDF, dimension/CAD drawing, revision date and approving technical person.

[ ] Warranty duration, exclusions, installation requirements and warranty claim evidence.

[ ] Product lifecycle: active/discontinued/replacement SKU, repairability and spare availability.

[ ] Evidence for every published performance or compatibility claim, including conditions and document revision.

Suggested catalogue CSV columns: sku, product_name, category, variant, price_inr, tax_inclusive, gst_rate, hsn, stock, low_stock_threshold, quote_only, lead_time, lubricant, pressure_bar, flow_value, flow_unit, reservoir_l, voltage, phase, frequency_hz, temperature_min_c, temperature_max_c, weight_kg, dimensions_mm, description, warranty, image_files, datasheet_file, drawing_file, approved_by, verified_date.

Original images and media

[ ] Each product: front, rear/connection side, side, three-quarter view, scale/dimensions context and identification label.

[ ] Each variant: photograph the actual differentiating feature; do not assign a wrong reservoir/motor image to a SKU.

[ ] Photograph installed systems with customer permission and remove private machine/customer information where needed.

[ ] Workshop exterior/interior, manufacturing/assembly, inspection/testing, packing and service work.

[ ] Team/proprietor photographs only with consent; no stock image presented as an actual employee.

[ ] Optional short installation/product demonstration videos; caption/transcript and ownership permission.

[ ] Clean, well-lit originals preferably at least 1600 px on the long edge; no messaging-app compression or embedded price labels.

[ ] Confirm ownership/license, photographer attribution if needed, permission to publish, and accurate alt-text description.

[ ] Use filenames such as DSL-OP-100_front_2026-10.jpg; map every file to the exact SKU and view.

[ ] Check backgrounds for customer names, safety issues, private documents, serial identifiers and unintended trademarks.

We will reuse only the concept image already generated until your originals arrive. It remains labelled as a demo visual. No additional product images will be generated.

Sales and fulfilment policies

[ ] Can all standard products be purchased online, or do some require engineer approval?

[ ] Which countries/states/PIN codes are served? Who calculates shipping charges and dispatch deadlines?

[ ] Are freight, insurance and installation included? What happens when delivery cannot be priced automatically?

[ ] Which couriers/freight providers are used, and what tracking evidence is available?

[ ] What are cancellation, return, damaged-delivery and refund rules? Who approves refunds?

[ ] What are payment methods, advance/deposit terms and credit rules? Is cash on delivery allowed?

[ ] Confirm invoice numbering, tax treatment, GST collection, HSN, legal wording and accounting requirements with your accountant.

[ ] Define quotation validity, discount limits, bulk quantities, delivery terms and conversion to an order.

[ ] Supply owner-approved terms, privacy, shipping, return and warranty text; identify policy revision owner.

Service and complaints

[ ] Which services are actually available: installation, commissioning, remote troubleshooting, repair, maintenance or onsite visits?

[ ] Confirm geographic coverage, working hours, response targets, escalation path and service charges.

[ ] Which problem categories and priorities should customers select? What defines an urgent case?

[ ] Identify required evidence: order/invoice, SKU/model, serial number, fault description, operating conditions, photos/video and site contact.

[ ] Explain how offline purchases and third-party equipment are validated.

[ ] Define ticket statuses, assignment rules, internal notes versus customer-visible replies, closure confirmation and reopening.

[ ] Define warranty checks, repair estimate approval, replacement process and return shipment responsibility.

[ ] Who receives new ticket notifications, and who covers absences?

Employee access and inventory

[ ] List each worker's name, work email, department, role and manager. Use individual accounts.

[ ] Specify who may edit products, prices, stock, discounts, orders, customer records, tickets, refunds and settings.

[ ] Confirm proprietor-only controls, approval limits and restricted information such as cost/margins.

[ ] Define joining/leaving process, access revocation, staff MFA and permission reviews.

[ ] List warehouses/stores/bins and opening stock evidence; explain receipt, dispatch, return, stocktake and adjustment rules.

[ ] Confirm whether future scope includes raw materials, bill of materials, manufacturing orders, batches/serials, purchasing and suppliers.

[ ] Define stock reservation expiry, backorder policy and procedure for a late payment when stock is unavailable.

[ ] Specify reports required: sales, low stock, pending orders, quote conversion, open service and ageing.

SEO and proof of business

[ ] Supply approved business description, actual product/service coverage and preferred brand spelling.

[ ] Confirm ownership of Google Business Profile, Search Console, domain and current website URLs.

[ ] Provide genuine certifications with issuer, scope, expiry and permission to publish; no claim based on a competitor's certificate.

[ ] Provide client logos/testimonials/case studies only with written permission and support for outcome claims.

[ ] Identify customer search terms, applications, common technical questions and priority locations actually served.

[ ] Supply original technical answers for selection, installation, troubleshooting and maintenance, reviewed by a qualified company person.

[ ] Define who approves content updates and checks that datasheets, prices and availability stay current.

Future AI and workflow automation

Document current process before deciding which parts AI should automate. Start with draft-only workflows and retain accountable human reviewers.

[ ] Which inboxes contain orders and enquiries? Gmail, Microsoft, IMAP or another provider? Which folders/labels are in scope?

[ ] Provide redacted examples of purchase orders, emails and attachments, including scans, PDFs, spreadsheets, amendments, cancellations and duplicates.

[ ] Identify required extracted fields: customer, PO number/date, SKU/model, quantity, unit, requested date, ship-to, GST and attachments.

[ ] Define SKU/customer matching rules and cases that must stop for manual review. Can AI infer a missing field? Default recommendation: no.

[ ] Define duplicate detection, revised order precedence, forwarded threads, currency/unit mismatches and uncertain OCR handling.

[ ] Provide approved quotation format, numbering, taxes, price source, discounts, validity, terms and signature.

[ ] Who approves a quotation? Under what conditions may a later workflow send it automatically? Specify explicit thresholds.

[ ] Which Tally edition/version and company are used? Who manages the Tally machine, backups and access?

[ ] Which Tally operations are desired: ledger lookup, stock lookup, sales order, invoice, receipt, credit note or export? Confirm current workflow with the accountant.

[ ] Supply redacted ledger/item/group mappings, units, GST configurations, voucher types, numbering and sample accepted vouchers.

[ ] Confirm local/remote connector method, required licenses/network availability and whether import/export is preferable to direct write.

[ ] Define reconciliation, accounting period locks, duplicate voucher handling, rejected imports, reversals and owner approval before posting.

[ ] Identify tasks that AI must never execute without review: payments/refunds, tax/accounting changes, discounts beyond limits, deletion, external sending and permissions.

[ ] Specify data retention, allowed AI providers, attachment privacy, audit requirements and prompt-injection handling for untrusted emails.

[ ] Define success metrics and fallback: reviewed extraction accuracy, time saved, duplicate prevention, failed run queue and manual continuation.

Workflow description: Trigger _____ Inputs _____ Steps _____ Reviewer _____ Allowed actions _____ Stop conditions _____ Evidence _____.

Technical setup before launch

[ ] Owner controls domain/DNS, hosting, database and backups; technical team receives only needed access.

[ ] Payment merchant onboarding and settlement details configured through provider interfaces, never pasted into this checklist.

[ ] Google OAuth consent/client configuration and approved redirect domains.

[ ] Transactional sender domain/email verification and staff notification recipients.

[ ] Production private upload storage, retention rules, malware handling, size limits and access controls.

[ ] Backup restore drill, monitoring, support ownership and renewal responsibilities.

[ ] Final original-data import, permission review, contact checks, mobile/keyboard tests and test transaction approval.
